OBJECTIVES

Passionate Computer Science & AI student at Egypt Japan University of science and Technology (EJUST) with a CGPA of 3.4. Expert in building cross-platform mobile applications using Flutter and scalable web solutions using MERN Stack and PHP/Laravel. Dedicated to integrating AI capabilities (LLMs & Computer Vision) into production-ready applications to enhance user experience and automate complex workflows.

PROFESSIONAL EXPERIENCE

- **Information technology institute - ITI**
  Full-Stack Developer Intern, **July 2025 - August 2025, Remote**
  - Analyzed large datasets and provided actionable insights using SQL and Power BI.
  - Created interactive dashboards to visualize business trends Authored technical documentation for model
  - Engaged with Huawei Big Data tools and ecosystem to manage large-scale data processing tasks

- **National Telecommunication Institute - NTI**
  Mobile Application Developer, **July 2024 - July 2024, On-site**
  - Applied Artificial Intelligence techniques to real-world business scenarios, including data-driven decision-making and process automation.
  - Analyzed datasets to extract insights and support strategic planning.
  - Developed predictive models to optimize operations and enhance customer experience.

- **Mindset**
  AI & Data Science Trainee and Mentor, **October 2024 - June 2025, Hybrid**
  - Mentored and guided students in Artificial Intelligence projects, covering model development, data analysis, and deployment.
  - Evaluated and graded student assignments, ensuring accuracy, quality, and adherence to learning objectives.
  - Conducted student interviews and assessed technical and soft skills for program placement.
  -

- **Information technology institute – ITI**
  Building LLM and RAG systems, **January 2026 - February 2026, online**
  - Engineered Retrieval-Augmented Generation (RAG) pipelines by integrating LLMs with vector databases (e.g., Pinecone, Milvus, or Weaviate) to enable semantic search over private datasets.
  - Architected end-to-end LLM workflows using frameworks like LangChain or LlamaIndex to automate complex business logic and decision-making processes.
  - Optimized model performance through advanced prompt engineering, fine-tuning, and evaluation frameworks (e.g., RAGAS) to ensure factual accuracy and reduce hallucinations.

EDUCATION

Egypt Japan University of Science & Technology
***Bachelor, Computer Science and Artificial Intelligence**, 2022 - 2026*
- CGPA - 3.4

CERTIFICATIONS

- Deep Learning Fundamentals, NVIDIA
- Business Startup Camp Simulation - E-JUST
- Innovation and Entrepreneurship, ITIDA
- Python Programming, Mahara Tech – ITIMooca
- Data analysis using Excel – Eng/Alaa Essam

- AI and Machine Learning – Mindset
- ECPC competitive programing 2024 - AAST

PROJECTS

View All Projects

- **AI-Powered E-Commerce Platform** **July 2025**
  - Built a full-stack platform using Next**.js** and Tailwind CSS for the frontend, and Laravel for the backend.
  - Integrated a Recommendation System (AI) to suggest products based on user behavior
  - Implemented secure payment gateways and an administrative dashboard for inventory management.
  -
- **AI Chatbot (NLP-based),** **April 2025**
  - Built an AI chatbot using Natural Language Processing for user interaction and task automation.
  - Trained models using Rasa and Transformer-based architectures to handle intents and dialogue management.
  - Integrated with a web interface for live testing and feedback collection.
- **Smart Task Manager** **May 2025**
  - Created a Flutter application that uses NLP to categorize user tasks automatically.
  - Used **SQLite** for offline data persistence and Riverpod for efficient state management.
  - Featured a voice-to-task conversion tool using Google Cloud Speech-to-Text.
- **GAN-based Image Generation web interface-AI Integration** **June 2025**
  - Developed a Generative Adversarial Network (GAN) to generate synthetic images from random noise input.
  - Built and trained Generator and Discriminator models using TensorFlow and Keras.
  - Applied Deep Convolutional GAN (DCGAN) architecture on datasets like MNIST and Fashion-MNIST.
- **Movies and products Recommender system** **December 2024 - January 2025**
  - Implemented a human activity recognition system using sensor data (e.g., accelerometer, gyroscope) to classify user movements.
  - Applied LSTM and Random Forest models to sequence data for accurate multi-class classification.
  - Used Scikit-learn and TensorFlow for training and evaluation.

SKILLS

- **Programming & Tools:** Python, SQL, MySQL, Git, GitHub, Jupyter Notebook, Google Colab, C++, assembly, Data structure, Algorithm
- **Mobile Development:** Flutter, Dart, State Management (Bloc/Riverpod), Firebase, Push Notifications, App Deployment.
- **Web Development:** React.js, Next.js (Modern Web), Tailwind CSS, Bootstrap, JavaScript (ES6+), TypeScript.
- **Backend & Databases:** Node.js, Express.js, PHP (Laravel), MongoDB, MySQL, PostgreSQL.
- **AI Integration:** Integrating OpenAI APIs, Agentic AI-LangChain, RAG systems into web/mobile apps, Vector Databases.
- **Tools:** Git, GitHub, Docker, RESTful APIs, Postman, Linux, Agile/Scrum.

Volunteering

- **JLPT Exam organizer at EJSUT (Japanese language proficiency test)**
  Organizer **Jun 2025 - Present**
  - Guided participants in projects, promoting collaboration on science and technology challenges.
  - Fostered problem-solving skills, enabling teams to develop creative solutions for complex applications.
  - Facilitated interdisciplinary teamwork to advance project outcomes in exploration and technology.
- **ECPC** competitive programing
  Event Organizer, **March 2025**
  - Assisted in organizing a countrywide AI and Robotics programming competition with a capacity of 5,000, including 1,500 participants and 3,500 parents/spectators.
  - Contributed to event logistics, ensuring smooth execution and engagement for a diverse audience of young innovators and supporters.
  - Supported a competition that enhanced technical skills for 90% of participants, fostering growth in AI and robotics expertise.
